

System Design Specification For Employee Leave Management System

1: INTRODUCTION

'Employee Leave Management System' is to ease the leave management and easy-to-use the system for Admin/Manager/User to apply, approve, deny the leaves etc.

For the users it is useful to request for leave and comp offs as well, and it is also beneficial to cancel the leave directly before the approval of the request. Above all, we hope to provide a comfortable experience.

There will be different types of user (Admin, Manager, Employee) each with different functionality.

Fig 1.1: Layout of the System

'Employee Leave Management System' allows employees to apply for leaves, check leave balance, approved, leaves, holiday list etc. It tracks leave data accurately which is used for automated payroll processing.

2: System Overview

2.1: Architecture

'Employee Leave Management System' will be the best solution to provide an easy access to the Admin/Managers/Users to handle the leave management and other facilities. The system will reduce loss of time and will give quick access.

In this system there will be only one admin. The system will allow the Admin/Manager/Users to login into the System.

The system contains an application program and a database system. Application program is a bridge between user and database. The database system consists of a large storage unit and a system to perform action on that data.

The program performs the basic operations upon the database as retrieving, inserting, updating, and deleting data. The goal of leave management is to handle employee time-off requests in a fair and accurate way, so business runs smoothly while employees get the benefits they are entitled to.

2.2: Flow Chart

3: Development Tools

3.1: Front End Technology:

RPG

RPG is a modern proprietary high-level programming language (HLL) for business applications, popular on the IBM i operating system on IBM Power Systems hardware. The current version, RPG IV, a.k.a. ILE RPG, provides a modern programming environment. IBM has evolved the language, providing new capabilities, to take advantage of technologies that have grown up in the marketplace.

3.2: Back End Technology:

DB2

DB2 is an organized collection of data. DB2 exploits the file system, it uses different kinds of tablespaces to extract the data as fast as it can from the physical device.

The language that you use to access the data in Db2 tables is the structured query language (SQL). SQL is a standardized language for defining and manipulating data in a relational database.

3.3 ER Diagram:

4: Data Directory

A data dictionary is a collection of descriptions of the data objects or items in a data model for the benefit of programmers and others who need to refer to them. The dictionary gives a brief description of the objects that will be needed to form the online employee management system.

PF Structure:

4.1: EMPMASTER – Employee Master PF having all employee details.

S.NO.	FIELDS	TYPE	SIZE	DESCRIPTION
1	Employee Id	Numeric	4,0	Generated while adding employees
2	Employee name	Char	30	Full name of employee
3	Address	Char	100	Complete address
4	Pin code	Numeric	6,0	Pin code
5	City	Char	20	Jaipur
6	Country	Char	20	India
7	Contact no.	Numeric	10,0	Mobile number
8	Emergency no.	Numeric	10,0	Emergency or alternate no.
9	Gender	Char	1	Gender of employee (M/F)
10	Date of birth	Numeric	8,0	Birth Date (YYYYMMDD)
11	Date of joining	Numeric	8,0	Joining date (YYYYMMDD)
12	Email (personal)	Char	30	Valid and working email-id
13	Email (office)	Char	30	Office email of employee
14	Team	Char	10	Team of employee
15	Project id	Char	6	Id for Project
16	Manager Id	Numeric	4,0	Employee id of Manager
17	Role	Char	1	Admin/Manager/Employee(A/M/E)
18	Designation	Char	20	Designation
19	Status	Char	1	Working status of employee(A/I)

4.2: LEAVES – PF for Employee Leaves which are requested.

S.NO.	FIELDS	TYPE	SIZE	DESCRIPTION
1	Employee Id	Numeric	4,0	Generated while adding employees
2	From Date	Numeric	8,0	From date to apply leave
3	From day type	Char	2	Type of leave (FH/SH/FD)
4	To Date	Numeric	8,0	To date to apply leave
5	To day type	Char	2	Type of leave (FH/SH/FD)
6	Total day	Numeric	2,0	Number of days for leave
7	Reason	Char	100	Reason for leave
8	Status	Char	1	Status of leave(A/D/P/C)
9	Leave Type	Char	2	(EL/CL/CO)

4.3: COMPOFF - PF for Comp Off's which are requested.

S.NO.	FIELDS	TYPE	SIZE	DESCRIPTION
1	Employee Id	Numeric	4,0	Generated while adding employees
3	Worked Date	Numeric	8,0	Date for comp-off
4	Day type	Char	2	Type of day (FH/SH/FD)
5	Reason	Char	100	Reason for Comp-off
6	Status	Char	1	Status of Comp-off (A/D/P/C)
7	Project Id	Char	6	Id for Project

4.4: LOGIN – PF for Id and Password of the Employees

S.NO.	FIELDS	TYPE	SIZE	DESCRIPTION
1	Employee Id	Numeric	4,0	Employee Id
2	Password	Char	20	Password to login

4.5: LEAVEBAL – PF to check the balance leaves.

S.NO.	FIELDS	TYPE	SIZE	DESCRIPTION
1	Employee Id	Numeric	4,0	Employee/ Manager ID
2	Casual Leaves	Numeric	2,0	No of Casual Leaves
3	Earned Leaves	Numeric	2,0	No of Earned Leaves
4	Comp Off Leaves	Numeric	2,0	No of Comp Off leaves

4.6: HOLIDAYS – PF to check all the calendar Holidays.

S.NO.	FIELDS	TYPE	SIZE	DESCRIPTION
1	Date	Numeric	8,0	Date for holiday
2	Day	Char	10	Day of Holiday
3	Remarks	Char	20	Reason of holiday
